SkullVault Blueprint - AI Connector Launch System

This guide details how SkullVault automates your empire with AI tools, calendar events, and reminders.

Each step connects systems like Google Calendar, Gmail, Notion, and Zapier to streamline your productivity.

GOAL

Build a smart, automated empire using GPT-4o as the brain. Tools like Gmail, Google Sheets, Notion, and Zapier execute your daily ops.

AI Connector Flow

Input -> GPT-4o -> Action. You speak, log a task, or upload a file. The AI decides and sends it to your connected tools.

Google Calendar Launch

Each calendar event includes an affirmation and reminder. You'll get notified just in time to stay locked in.

Affirmation Example

"I build my empire with focus and purpose."

Attached Systems

- Google Sheets: Logs + Streaks

- Notion: Daily Dashboard

- Gmail: Alert System

- Drive: Document Sync

- Tasker: Voice Commands

Setup Steps

1. Connect Gmail, Drive, Calendar, Docs, Notion

2. Add Zapier + Tasker triggers

3. Upload Blueprint PDF to Drive

4. Start launch via calendar
